- Intelligent staircase switch, the same use as CRM -4 , but with enlarged
possibility of control in mode $\ldots$ PROG", it is possible to select time of possibility of control in mode „PROG", it is possible to select time of
delayed OFF by number of button pressing. Each pressing multiplie time set by potentiometer, it means that in case you set time to 5 min and press the button 3 times, then the output is automaticall prolonged to 15 min . Output can be also switched off before time (reset) by long pressing of button (longer than 2 sec).
put relay contact $16 \mathrm{~A} / \mathrm{AC1}$ with inrush current up to 80 A enables switching of el. bulbs and also fluorescent lights.
- Operating system switch:
- ON - output is constantly ON (service mode)

AUTO - timing according to adjusting by potentiometer in rang $30 \mathrm{~s}-10 \mathrm{~min}$.
pressing. Timing (in mode AUTO and PROG) is possible to be stopped by long pressing of the button (>2 s ).
Voltage range: AC 230 V clamp terminals

- Output indication: multifif red LED, flashing at certain states
- 3 -wire or 4 -wire connection (it is possible to control input $S$ by ial A1 or A2).
- CRM-42: Warning before switch OFF- output doubleflash 40 and 30 sec before switch OFF.
- CRM-42F: Staircase switch without warning flashes especially suited for use with energy-saving lamps, where frequent flashing may cause damage to the light source.
- 1-MODULE, DIN rail mounting.
